

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## Introductory Notes to the Catalogue.

THE compilation of this Catalogue has been attended with considerable difficulty, chiefly on account of the hurried manner in which the materials have been brought together, and the rapidity with which it has been passed through the press.

In spite of the announcement made by circular and in the *Journal* to the effect that offers of exhibits should be sent in on or before May 17th, a number of exhibitors failed to make the necessary returns within the specified time, in fact some came in as recently as May 31st. These, however, have all been included in the Catalogue, and will be found in the Exhibition.

Again, the want of uniformity in the description of the exhibits made it absolutely necessary for the Editor to recopy and rearrange the whole of the dated portion, amounting to several hundred entries. These reasons, therefore, must be taken as excusing in some degree any errors or imperfect descriptions which may have crept into the Catalogue in the course of compilation.

The plan of the Catalogue is simple, and is as follows:—The first portion contains a general list of exhibits arranged under the names of the exhibitors, which are placed, as far as practicable, in alphabetical order. In the case of Dated plates, where the dates are given by the exhibitor, entries will be found under the date in the Chronological List, which forms the second portion of the Catalogue; the figures at the end of the lines giving reference to the exhibitor in the first portion of the Catalogue.

Having taken Hamilton's "Dated Book-plates" as our guide in the compilation of this list, we have checked each entry by that valuable work of reference, placing an asterisk against those dates which do not appear in that work. These, in the earlier portion of the Catalogue, are comparatively few; but all (with one or two exceptions) which were executed after 1894 are new to Hamilton, they having appeared subsequent to the publication of the last section of his list. [See footnote on page 44.]

This being the first Catalogue which has been issued in connection with the Annual Exhibitions of our Society, we have spared no pains in our endeavour to make it exhaustive and reliable; and we trust, therefore, that it will be so far acceptable to our members as to warrant the Council in publishing a similar work for subsequent meetings.

Primarily, the Exhibition is one of "Dated Plates," and the accompanying list will sufficiently testify to the value of the exhibits under this head. Other items, however, are not excluded. It will be found, therefore, that there are a considerable number of undated plates, and that many works of modern artists are here exhibited for the first time.

It is somewhat invidious to single out any particular exhibit for special reference, but we feel justified in calling attention to the interesting series of heraldic documents exhibited by our President (No. 63), and to the interesting items (other than book-plates) to be found in the general Catalogue under the following numbers:—1, 5, 14, 15, 26, 37, 42, 43, 46, 51, 64.

The illustrations (six in number) have been selected not only as representing different periods and styles, but also because they have not been previously reproduced. This fact will doubtless enhance the value of the Catalogue, and induce our members to preserve it as a useful contribution to Ex Libris literature.

W. H. K. WRIGHT.
